Teachers who use children's literature as an integral part of their curriculum are challenged to keep abreast of newly published titles. Librarians who are supporting the classroom curriculum also have the same challenge. Part of my role as a consultant is to support teachers and librarians in their discovery of new titles. To do so I have compiled this list of excellent choices of trade books for kindergarten through ninth grade.

I have read all the books on the list with an eye toward classroom use. I receive thousands of review copies from the major children's trade publishers each year. This access allows me to select from a variety of choices. I may read from ten to fifteen titles to find one that will be on the list. The list that follows is offered to teachers and librarians to save them time, and money. The list is not intended to limit but to be a beginning for those who need to have some guidance.

Thousands of new books roll off the presses of the major children's publishers each year. To discover the best of these new books takes many hours. Too often, limited funds are spent on titles that may sound attractive in a catalogue but prove otherwise when ordered. Gaining access to new titles, reading the books, setting criteria for selection and matching the titles to the needs of the targeted students is a lengthy process.

I suggest a visit to your local library or children's book store to browse and read before purchases are made. When teachers and librarians make their own choices they will be enthusiastic about the books and that excitement will transfer to their students.
